## **DISPLAY DEVICES INTRODUCES CAMERA CEILING LIFT FOR TELECONFERENCING APPLICATIONS**

Display Devices introduces the newest product in their extensive line of lift products: The Teleconferencing Camera Ceiling Lift. This sleek, ultra-quiet lift effortlessly lowers a camera from the ceiling to the desired eye level in just seconds. Gone are the days of clumsy, fixed-mounted cameras that broadcast the subject's torso or over their head. An attractive column lift design ensures that the lift is as elegant as it is functional. The Teleconferencing Camera Lift will be on display at the 2008 Infocomm Expo (booth #N6112).

### **About Display Devices**

Founded in 1989, Display Devices has carved a niche in the Audio/Visual marketplace as the innovator of specialty mounting solutions. Its extensive line of standard products includes motorized lifts, mounts and enclosures for projectors and flat panel displays, camera pan-tilt systems, wall plates, rack panels, staging products and more. The in-house engineering team and on-site manufacturing capabilities place Display Devices in the unique position of providing custom solutions as well. If you can draw it, they can make it. Display Devices is well known as a valued OEM partner to some of the most respected manufacturers in the A/V industry.
