DISPLAY DEVICES INTRODUCES MOTORIZED ROTATING MOUNTS FOR WALL AND CEILING APPLICATIONS

September 14, 2007, Arvada, CO

Display Devices introduces the MRWM – a motorized rotating wall mount for flat panel displays. The mount is available in two configurations – portrait-to-landscape and continuous rotation. Applications include digital signage for exhibits and retail, staging / theatrical and commercial installations where both portrait and landscape modes are needed.

Motorized Rotating Wall Mount

The MRCM – Motorized Rotating Ceiling Mount is also available in two configurations – 2 positions or continuous rotation. The two position version is especially useful in situations where two different viewing positions are required. It is available for both flat panel displays and projectors. The continuous rotation model will rotate indefinitely adding motion to otherwise static flat panel displays. Applications include casinos, retail POS, exhibit, museum and other public signage venues.

About Display Devices

Founded in 1989, Display Devices has carved a niche in the Audio/Visual marketplace as the innovator of specialty mounting solutions. Their extensive line of standard products includes motorized lifts, mounts and enclosures for projectors and flat panel displays, camera pan-tilt systems, wall plates, rack panels, staging products and more. The in-house engineering team and on-site manufacturing capabilities place Display Devices in the unique position of providing custom solutions as well. If you can draw it, they can make it. Display Devices is well known as a valued OEM partner to some of the most respected manufacturers in the A/V industry.
