DISPLAY DEVICES INTRODUCES THE BRIGHTEST LCD DISPLAY IN THE WORLD

Display Devices introduces SunView Ultra Bright display technology: displays with brightness levels suited for direct sunlight outdoor environments. These remarkable displays provide an astonishing 2800 cd/m² light output making them the brightest displays in the world, and more than six times brighter than standard displays. This technology makes them an excellent choice for quick-service drive-thrus, amusement parks, outdoor shopping centers, or any other location where dynamic outdoor digital signage is required. 40" displays are currently available, with more sizes in the works. They include auto-dimming capabilities for nighttime viewing and can optionally be installed in our PE Series Environmental Enclosures. A SunView Ultra Bright display will be showcased in Display Devices' booth at the InfoComm Expo (booth #N6112).

About Display Devices

Founded in 1989, Display Devices has carved a niche in the Audio/Visual marketplace as the innovator of specialty mounting solutions. Its extensive line of standard products includes motorized lifts, mounts and enclosures for projectors and flat panel displays, camera pan-tilt systems, wall plates, rack panels, staging products and more. The in-house engineering team and on-site manufacturing capabilities place Display Devices in the unique position of providing custom solutions as well. If you can draw it, they can make it. Display Devices is well known as a valued OEM partner to some of the most respected manufacturers in the A/V industry.
