## **DISPLAY DEVICES INTRODUCES REDESIGNED TFT-50 LCD MONITOR LIFT**

November 2, 2007, Arvada, CO

Display Devices, Inc. introduces the latest version of our popular TFT-50 LCD Monitor Lift. The TFT-50 is a small, low-profile lift that is designed to raise a display from furniture or lower it out of a cabinet. It offers 15" of travel, and the compact design allows plenty of "knee room" when installed within a desk or boardroom table.

The newest revision of our TFT-50 lift is more compact and has a much more attractive design. The display glides effortlessly on an unobtrusive column -- no gear rack or drawer slides are visible when the lift is in the up position. Meanwhile, unsightly wires and cables are neatly tucked away in the new built-in cable management channel.

The list price for the TFT-50 is \$990.00. It will begin shipping in Q1, 2008.

### **About Display Devices**

Founded in 1989, Display Devices has carved a niche in the Audio/Visual marketplace as the innovator of specialty mounting solutions. Their extensive line of standard products includes motorized lifts, mounts and enclosures for projectors and flat panel displays, camera pan-tilt systems, wall plates, rack panels, staging products and more. The in-house engineering team and on-site manufacturing capabilities place Display Devices in the unique position of providing custom solutions as well. If you can draw it, they can make it. Display Devices is well known as a valued OEM partner to some of the most respected manufacturers in the A/V industry.
