DISPLAY DEVICES INTEGRATES INDUSTRY-LEADING THERMAL CONTROL SYSTEM INTO ENVIRONMENTAL ENCLOSURES

Display Devices introduces a proprietary thermal sensing control system designed to be the "brains" of their outdoor digital signage products. While competitors offer only thermal sensing and fan controllers, Display Devices' control system offers switched AC for the display, fan control with failure detection, optional heat and air conditioning, vibration sensor, door open sensor, up to six thermal sensors, audible alarm, local temperature control panel, and much more. The system can be linked to an internal media server via RS-232. A model and diagram of the Thermal Control System will be on display at the 2008 Infocomm Expo (booth #N6112).

About Display Devices

Founded in 1989, Display Devices has carved a niche in the Audio/Visual marketplace as the innovator of specialty mounting solutions. Its extensive line of standard products includes motorized lifts, mounts and enclosures for projectors and flat panel displays, camera pan-tilt systems, wall plates, rack panels, staging products and more. The in-house engineering team and on-site manufacturing capabilities place Display Devices in the unique position of providing custom solutions as well. If you can draw it, they can make it. Display Devices is well known as a valued OEM partner to some of the most respected manufacturers in the A/V industry.
